

## Fun of Camping World

Potential fun is endless in the camping world. Enjoying the benefits of the great outdoors is the main attraction of the camping world. A few of the possibilities to partake in while camping include swimming and hiking, as well as some rest and relaxation. There are many joys to be had in the camping world. However, although it is good to be prepared for whatever activities you would like to do, it is even more important to be ready to deal with those you would rather avoid.

A tent or other shelter is the main thing that you will need for camping. A tent or other shelter will help protect you against the elements. The conditions in the camping world can range from bright and sunny to torrential downpours in a matter of minutes! The inside of a tent can shield you from the sun in very hot weather. In keeping dry during rainstorms, a sturdy rain fly over the roof of your tent can go a long way. The floor will stay dry, too, if you spread a tarp beneath your tent. A great alternative for shelter can be a pop up camper if your budget allows for it. A number of shelter options are available for the camping world.

Feeling the cool breeze blow through your tent, sleeping under the stars can be two of the best parts of camping. To make sleeping even more comfortable, it is wise to invest in sleeping bags and padding. Depending on your needs, there are many styles of sleeping bags. You can get a conventional sleeping bag that zips up around your chest. Mummy style sleeping bags are another option, and they can zip up and around your head. You can get a sleeping bag that suits your needs as far as temperature range, material and color criteria. Padding or mats for underneath your sleeping bag are also good to have. You can get anything from a foam egg crate style pad to a blow up mattress, depending on your needs. With the right gear, you will be comfortable and warm at night.

As far as outdoor activities go, there are a wide array of possibilities. Something many people enjoy doing is hiking. Terrain and distance vary with the difficulty level of hiking trails. It is best to be prepared, even on the easiest of trails. One item you should bring is bottled water. Keeping hydrated is of the utmost importance while engaging in any exercise, hiking included. Hiking boots are another item that make the trek easier. These come in many different colors and materials, depending on your needs and budget. It is a wise choice to bring some sort of compass or global positioning system device with you on a hike, in case you get lost. You may even want to bring a light snack such as trail mix for longer treks. Hiking should be comfortable and safe with these provisions.

There are many other things you could bring into the camping world with you. Some that have not been mentioned are cooking gear, dry firewood, and of course, dry matches! Many of the aforementioned items you need are very durable and can last you for years of camping fun. Endless wonderful memories of camping can be yours if you follow these tips!
